BACK STRIP

With the back strip in place, a 50 mm space remains between the range and the wall. The overall depth of the appliance (rail not included) then reaches 700 mm (an increase of 50 mm).

The back strip prevents excessive heat transfer to the wall and makes cleaning easier. It is especially recommended for all ranges equipped with gas ovens or those with tiles on the wall above the cooker.

For grilling and roasting meats and fish, nothing comes close to the convenience and performance of the salamander. This is also true for the browning of gratins or desserts: the salamander is second to none for turning out perfect ‘crèmes brûlées’, topped with the traditional caramelised sugar crust.

The electric revolving spit makes grilling and roasting in the genuine French tradition a breeze.

The salamander is wall-mounted. It is available in stainless steel, black or in a choice of enamelled colours.

- Salamander electric grill with wall-mounting bracket.
- Nominal power: 3 kW.
- Power supply: 230/240 V.
- Integrated timer (0 -120 minutes).
- Adjustable 3 kW heating element with removable heat protection for cleaning.
- Power supply cable included (without plug).
- Wall-mounting bracket included.
- Adjustable rack (4 different heights) for 1/1 ‘Gastronorm’, sized dishes.

HOODS

Lacanche hoods are designed for venting cooking smells and fumes outside of the cooking area. Lacanche hoods can accommodate motors of different models, brands and sizes.

Please note: Lacanche hoods are not equipped with vent motor units. Vent motor groups must be provided by the customer.

A drawing of the cut-out required in the lower support plate must be provided when ordering.

Finishing:

Front and side beams and upper duct cover in stainless steel, black cap.

Option:

- Canopy color reference: **LOCH**

The upper cover boxes are made of stainless steel. Adjustable in height (from 0 to 240 mm), they allow a homogeneous connection to the ceiling.

Option:

- Custom cabinet, height to be specified: 250 / 500,500 / 750,750 / 1000

The installation of Lacanche hoods is simplified thanks to good accessibility to the elements techniques. It is necessary, before installation to ensure the solidity of the wall serving as a support.
